Divisional Public Health Office,
Adiscombe House,
Barnsley Road,
Hemsworth,
Nr. Pontefract.

16th, June, 1950.

To the Chairman and Members of the Urban District Council.

Mr. Chairman and Members,

I have the pleasure to present to you my report on the Health and Health Services of your district for 1949.

The report is drawn up in accordance with the requirements of Circular 2/50, Ministry of Health, 25th January, 1950.

In addition, I have included data relative to the services administered by me for the West Riding County Council as their Divisional Medical Officer, as I feel this will be of interest.

I am glad to be able to report that most of the difficulties which arose last year with the sweeping change-over of administration under the National Service Act have disappeared and the various schemes are now operating smoothly and satisfactorily.

There has been a slight increase in the population, according to the Registrar-General's figures, whilst progress in building has been maintained, with the result that there were 57 more inhabited houses in the area at the end of this year than there were at the end of 1948. Unfortunately, in common with the rest of the country, there is still an acute shortage of houses.

The number of births has dropped, namely, 282 being notified as compared with 315 during the previous year. The 1949 figure is practically on a level with that of 1947, namely, 278, so it may be that the rise in 1948 was due, to some considerable extent, to the return home of men from H.M. Forces after varying periods of absence.

Again, I am happy to report a further decrease in the number of still-births, 7 being registered as compared with 10 in 1948, and 13 in 1947.

Two maternal deaths were reported. Both of them happened outside your district, one occurring at an address in Leeds when the woman was staying at Morley, and the other occurring in hospital.

Seventeen deaths in children under one year of age were notified. All these were in legitimate children and were accounted for as follows:—

Pneumonia	...	...	...	3
Bronchitis	...	...	...	1
Congenital Debility	...	...	...	2
Whooping Cough	...	...	...	1
Prematurity	...	...	...	2
Other Digestive Diseases	...	...	...	1
Appendicitis	...	...	...	1
Pulmonary Tuberculosis	...	...	...	2
Other causes	...	...	...	4

It is gratifying to be able to report a further reduction in the number of infectious diseases, 313 notifications being received as against 332 in 1948, and 749 in 1947.

Approximately 60 per cent of these notifications were for children suffering from Measles and Whooping Cough.

I am still concerned about the large number of tuberculosis cases notified in the district and am afraid that all the facilities available for treatment and after-care will not hit the target they aim at until priority housing of T.B. victims is seriously considered by the local authority.

The scheme for free milk for patients suffering from tuberculosis was transferred to the Divisional Health Office in October and, since that date, 27 grants were issued to patients in your district.

The Scarlet Fever figure has again dropped considerably, only 27 notifications being received as compared with 61 in 1948 and 195 in 1947. Diphtheria maintains its record with no victims. This proves the value of immunisation, which is being continued in your district throughout each year.

In 1949, 206 children under 5 years of age, and 76 children 5-14 years of age were immunised, whilst 45 received boosters.

There were two cases of Poliomyelitis. One was a baby of 11 months who was treated at home, the other was a young lady of 24 years of age, who was a mill employee at Wakefield. This case was treated at the County General Hospital, Wakefield. The cases have been and are being followed up by the Health Visitors.

Food Poisoning: — There was no outbreak of food poisoning reported during the year, neither were any individual notifications received.

Scabies: — The following patients have been treated at the Cleansing Station, Rotherham Road, Hemsworth, during the year:

Men	...	...	...	...	9
Women	...	...	...	...	14
Children	...	...	...	...	55

Total					78
					—

GENERAL PUBLIC HEALTH SERVICES.

Laboratory Services:—Specimens of milk, water for bacteriological examination, throat swabs, faeces and foodstuffs are submitted to the Public Health Laboratory of the Medical Research Council, Wakefield, whilst chemical examinations are undertaken by the Public Analysts at Bradford.

Ambulances Services:—This service is administered by the West Riding County Council and the Depot is situated at South Kirkby, where there are 4 ambulances and 2 ambulance buses.

The driving staff employed is 22. The number of journeys made in conveying patients from the Rural and Urban Districts are 5,568 and 134,531 miles were covered in so doing.

Sanitary Circumstances:—(This information has been provided by Mr. Fox, Sanitary Inspector, and Mr. Wren, Waterworks Manager, to whom I am grateful for their co-operation and assistance).

Water:—The quantity has been satisfactory but there was a period from 6th September to the 5th December when restrictions in supply had to be exercised owing to a drought.

No report of contamination has been received.

Only one house is not on public supply.

Two samples were submitted for chemical analysis and the following are copies of the Analyst's reports:—

Barnsley Corporation (Hemsworth Joint Water Committee) Sample submitted 18th. March, 1949, from Tap, Barnsley Road, Hemsworth.

	Parts per 100,000			
Total Solids	...	...	...	5.0
Chloride	...	...	...	1.3
Nitrite	...	...	...	Nil
Nitrate	...	...	...	0.10
Free Ammonia	...	...	...	.002
Albuminoid Ammonia	...	...	...	.002
Poisonous metals	...	...	...	Nil
Total Hardness	...	...	...	3.8
pH.	...	...	...	8.0

This is a water of good organic quality.

Sample submitted 16th December, 1949, from Tap at 53, Rotherham Road, Hemsworth.

	Parts per 100,000			
Total Solids	...	...	...	5
Chloride	...	...	...	1.5
Nitrite	...	...	...	Nil
Nitrate	...	...	...	Trace
Free Ammonia	...	...	...	.002
Albuminoid Ammonia	...	...	...	.002
Poisonous Metals	...	...	...	Nil
Total Hardness	...	...	...	3.4
pH.	...	...	...	8.0

This water is of satisfactory organic quality.

Swimming Baths:—I regret to say that there is still no swimming bath in Hemsworth and the inhabitants desiring a swim must go to either South Elmsall or Featherstone, or to one of the large towns about 10 miles away.

Drainage and Sewerage:—No extensions in 1949 other than to the new housing estates.

Parts of district still requiring sewerage: Station Road and Robin Lane, Hemsworth.

Number of houses not connected to sewers — 22 (chiefly in the Station Road area where there is no sewer and all the houses are on the Cesspool system.

Closet Accommodation:—One privy has been converted into a W.C. during the year and the position is as in my report for 1948, except that 43 W.C's have been provided for the new houses

As previously reported, all houses with privies are to be considered for closing when the housing situation is favourable. The details are as follows:—

Privy middens	...	...	49
Pail and Tub Closets	...	...	6
Waste Water Closets	...	...	6
Water Closets	...	...	3385

PUBLIC CLEANSING.

(Details Supplied by Sanitary Inspector):—The weekly collection of dry ashes is still maintained and during the year a new refuse vehicle was purchased. The privies are emptied at approximately fourteen days' interval and the whole of the refuse is conveyed to the tip at Rotherham Road where controlled tipping is in operation. The number of loads of dry ashes removed was 3,360 and the total cost, including tipman and new vehicle, was £4,800.

The system of supplying dustbins, upon request by the owners is still in operation and during the year I have supplied 101 bins without the necessity of serving Formal Notice.

Cesspools:—The cesspools in your area are emptied by the Council's cesspool emptier at regular intervals and the contents deposited in the Council's sewer at the nearest point to the Sewage Works. These cesspools are chiefly in the Station Road part of your area, which is not sewered.

Salvage:—Paper is still the chief item which is salvaged, and owing to the reduced price now obtained for this it is problematical whether this is still a paying proposition.

The amount of salvage collected is:

Paper—41 tons 8 cwts. 2 qtrs.	...	221	10	1
Rags—8 cwts. 3 qtrs.	...	...	8	6 11
				£229 17 0

Rat Infestation: The sewers in your area have been pre-baited and poisoned twice during the year and on the second occasion no "takes" of any kind were reported. Your sewage works and tips are poisoned as and when found necessary and complaints concerning infestation are dealt with as they arise.

Inspection and Supervision of Food Supplies:—The Ministry of Food Slaughterhouse which is in your area is the only one in

use and the duties of meat inspection there is shared between your Sanitary Inspector and the Sanitary Staff of the Hemsworth Rural District Council, each taking alternative weeks. 214 visits have been paid to this Slaughterhouse during the year and the number of cattle etc., inspected and the number condemned or parts condemned is appended. The total weight of meat condemned was approximately 8 tons. In addition, 21 pigs, killed by private owners, were inspected.

	Cattle excluding Cows	Cows	Calves	Sheep and Lambs	Pigs
Number killed	800	245	178	3378	26
Number Inspected	800	245	178	3378	26
All diseases except T.B. whole carcasses condemned	1	—	—	3	3
Carcases of which some part was condemned	333	130	—	193	13
% of number affected with disease other than T.B.	41.75	53.06	—	5.80	61.54
T.B. Only:—					
Whole carcasses	—	9	1	—	1
Carcases of which some part was condemned	135	71	—	—	—
% of number inspected	16.87	32.65	.05	—	3.84

Farms and Milk Production.—41 inspections have been carried out in connection with farmsteads where milk is produced. Generally the premises and cattle have been found satisfactory.

Foods and Drugs.—4 samples of milk have been taken for examination for T.B., this being the number allocated to us by the West Riding County Council. One was found to be positive and the facts reported to the Ministry of Agriculture and Fisheries.

Ice Cream.—

No. of premises registered under Section 14 Food and Drugs Act, 1938	1
No. of inspections made	10

3 samples were submitted for analysis and as a result one manufacturer gave up business.

SHOPS ACT.—20 visits were made to shops in your area and as a result 3 Informal Notices were served and complied with.

FACTORIES.—71 visits have been paid to the 18 factories in your area and in three instances it was found necessary to serve Informal Notices for breach of regulations. These notices were complied with without the necessity of any further action.

The following is a list of sanitary inspections made during the year, also a report on the number of Notices served and complied with:

VISITS

To Infectious disease	49
Inspection for nuisances	392
Work in hand and re-visits	549
Slaughterhouse	214
Scavenging and salvage matters	173
Housing inspections	140
Common lodging house	38
Rubbish tip	82
Factories	71
Sampling milk and ice-cream	7
Farm	41
Private pig killing	21
Miscellaneous matters	181
	1958
No. of nuisances found	247
No. of nuisances outstanding 1948	31
	278
Abated	266
Outstanding	12
Statutory Notices Served (Section	
93 Public Health Act, 1936)	27
Statutory Notices complied with	19
Outstanding	8
No. of renewal slaughtermen's	
licences issued	32
No. of renewal of petroleum licenses	
issued	14

Housing.—43 new houses have been completed and occupied during the year (as against 302 built in 1948); 42 were erected by the local authority, of which 24 were of the two bedroomed type, and one was erected on behalf of a private owner.

It is not possible to give any particulars regarding overcrowding unless a survey of the district is made. It may be that according to the Ministry of Health standard there is little overcrowding, but if based on a bedroom standard there is overcrowding in a major degree. There are also, according to the housing applications, many two families living in one house, though not necessarily overcrowded.

140 houses were inspected for nuisances and defects and of these 92 were found to need further attention. These were all dealt with under the Public Health Act 1936 and the necessary work carried out by the owners.

In this connection serious difficulties arise in getting work done after orders are given owing to shortage of labour and materials and as a consequence essential repairs are very often delayed.

Common Lodging Houses.—There is only one Common Lodging House in your area and during the year a bath for the use of the frequenters of this place has been installed. 38 visits have been made and the place has always been found satisfactory.

W.R.C.C. SERVICES

The County Council are responsible for the following services, the day-to-day administration being under my control.

SCHOOL HEALTH SERVICES

Owing to staffing difficulties I was unable to accept full responsibility for day-to-day administration of this service until March.

Clinics are held at the following places:—

Clinic	Day and Time	In attendance.
Hemsworth West End School	Monday A.M. 9.30 — 12 noon.	Doctor and Nurse.
Fitzwilliam Church Hut	Tuesday A.M. 9.30 — 12 noon.	Nurse.

No. of attendances at the above Clinics in 1949 — 1203.

School Medical Inspections.—Routine medical inspections have been carried out by the Assistant County Medical Officers at each school and 269 scholars were referred for treatment.

Child Guidance Clinic.—Six scholars were referred to the Child Guidance Clinic at Barnsley.

Paediatric Service.—Six scholars were seen by the Paediatrician and his recommendations were carried out.

Consultant Orthopaedic Service.—Cases from this Division have been referred to the Orthopaedic Clinic at Pontefract, but this, in my opinion, is not a satisfactory arrangement and I am hoping to be able to arrange for a monthly clinic to be held in Hemsworth.

Eye Clinics.—These clinics are arranged by the Divisional Health Office at different points in the Division as and when demand arises and when the Regional Hospital Board's Ophthalmologist is available.

MENTAL HEALTH.—One Mental Health Social Visitor (Miss S. Appleyard), Telephone No. Office—Hemsworth 77/78, Home—Wakefield 5583, is engaged part-time in this district and she is responsible for the care and after-care of mental defectives (non-violent type).

The Social Worker supplies me with detailed reports on the patients' background and home environment and these are forwarded to the respective Hospital Management Committees.

A Duly Authorised Officer (Mr. H. Withers) is on call for this district. His telephone numbers are Office—Pontefract 258, Home—Hemsworth 244.

He deals with cases requiring urgent removal to Institutions under Lunacy and Mental Treatment Acts.

HOME NURSING

The following Home Nurses are engaged in the Urban District:

	Telephone No.
Sale, M. A., 124, Barnsley Road, Hemsworth.	Hemsworth 238.
Sweeney, W., Fitzwilliam (duties until October).	
Hobson, I., Relief Nurse.	

1,319 cases were attended by these nurses during the year.

DOMESTIC HELPS

These are provided, whenever possible, in the following cases:

- (a) Maternity cases.
- (b) Where the housewife falls sick or must have an operation.
- (c) Where the wife is suddenly called away to see her husband in Hospital, and arrangements have to be made to look after the children.
- (d) With elderly people who are infirm or one of whom falls ill.
- (e) Where several members of the family are ill at the same time.

Applications must be supported by a medical recommendation and are submitted to a County Council Sub-Committee for approval. Assessments are made in accordance with the County Council's Scale.

There were 9 Domestic Helps on the Register at the end of the year.

Number of cases attended during the year: 43.

MATERNITY AND CHILD WELFARE SERVICES

Midwifery.—There are three fully qualified midwives practising in your district. They are: Telephone No.
 Day, K., Bridge House, Fitzwilliam. Hemsworth 179
 Porter, M. V., 116, Tombridge Crescent, Kinsley. „ 145
 Newton, L., 78, Highfield Road, Hemsworth „ 127

Number of cases attended by midwives during 1949 as:

Midwives — 174. Maternity cases — 6.

Gas and Air Analgesia.—All the midwives are qualified to administer Gas and Air Analgesia and this they did to 102 cases.

Premature Babies.—There are now two midwives in the division specially trained in the care of premature babies and two premature baby outfits, containing special equipment, are available for use in homes where recommended by these midwives.

The number of premature babies notified during the year whose mothers are normally resident in the Urban District was:

No. born at home	3
No. born in Hospital:	10
No. who died within first 24 hours:	-
No. who died after that time:	2
No. who survived at the end of one month:	11

Health Visiting.—Two Health Visitors were employed full time in your district at the end of the year and one part time in your district and part time in the Rural district.

Visits made by the Health Visitors to:

	First visits.	Total-visits.
Expectants mothers:	32	63
Children under one year:	186	188
Child between the ages of 1 and 5 years:	30	1375

Child Welfare Clinics.—Clinics held in the Urban District are as follows:

Clinic.	Address	Day and Time.	Medical Officer and Health Visitor.
Hemsworth	The Hut, West End School Yard.	Each Wed. 2—4 p.m.	Dr. J. J. Smith and Mrs D. Shields.
Fitzwilliam	Church Hut.	Each Tues. 2—4 p.m.	Dr. R. H. Mumford and Miss I. M. Tuite.

No. of children under 5 years of age who attended the above clinics and who at the end of the year were:

Under one year of age: 193. Over one year of age: 200.

Ultra-Violet Ray Clinic.—An Ultra-Violet Ray Treatment Clinic is held at the Child Welfare premises on Tuesday, Wednesday and Friday afternoons.

Ante-Natal Services.—Clinic held:

Hemsworth	Hemsworth Child Welfare Clinic Premises.	1st Tues. & Dr. J. J. Smith and 3rd Thurs. Mrs Shields.
Fitzwilliam	Church Hut.	All day Dr. J. S. Laurie Thurs. and 2—4 p.m. Miss I. Tuite.

No. of women attending during 1949: 321.

Maternity Hospitals.—The West Riding County Council is still responsible for the booking of patients into these Hospitals in their area and a strict control over applications has had to be exercised owing to the shortage of beds and staffing problems.

Each application has been carefully investigated before submitted to the Bed Booking Bureau and 56 cases were admitted into the maternity hospitals from your area during the year. In addition, 3 expectant mothers were admitted by direct arrangements with the Hospitals.

Where a patient has been advised to make arrangements for her confinement to take place at home, a domestic help has been provided upon request.

Finally, I wish to express my appreciation of the interest taken in the work of my department by some of the members of the Council during the year and also to thank the other officials for their co-operation and kindness, with special mention of the Sanitary Inspector, Mr. Fox, for his ever-ready help, and the members of my office staff led by the Chief Clerk, Mr. H. Hudson, who have coped valiantly during the year with the ever increasing volume of work which had to be done by them.

I am,

Your obedient Servant,

JOHN WARRACK.

Medical Officer of Health
